River Safety

The waters released below Buford Dam rise suddenly and swiftly. Warning horns located along the river between the dam and Georgia Hwy. 20 bridge will sound prior to the release of water. All persons on this section of the river must wear an approved PFD at all times. For information on water release schedules and safety information tune to 1610 AM on your radio or call (770) 945-1466. Remember that water release schedules can change on short notice.

VICINITY MAP

BASIN MAP

Apalachicola-Chattahoochee-Flint Rivers Waterway

The Apalachicola, Chattahoochee, and Flint River system (ACF) is managed by the US Army Corps of Engineers. The ACF extends approximately 385 miles from northeast Georgia to the Gulf of Mexico. The total drainage area of this basin is about 19,600 square miles.

Corps of Engineers operated dams and lakes in the ACF system include:
- Buford Dam and Lake Lanier
- West Point Dam and Lake
- W.F. George Lock and Dam, and Lake Eufaula
- George W. Andrews Lock and Dam and Lake
- Jim Woodruff Lock and Dam and Lake Seminole

The ACF also includes several smaller private dams and reservoirs operated by public utilities and corporations.

STATISTICS

STREAM DATA

Drainage area (square miles)	1040
Average stream flow (cubic feet per second)	2024

LAKE

ELEVATION (feet above mean sea level)

Top of flood control pool	1085
Top of power pool	1071
Bottom of power pool	1035

STORAGE CAPACITIES (acre feet)

For flood control	637,000
For power production	1,049,400
In permanent pool	868,000

AREAS AND LENGTHS OF SHORELINE

	Area (Acres)	Shoreline (Miles)
Top of flood control pool	47,000	760
At top of power pool	39,000	692

DAM

ELEVATIONS (feet above mean sea level)

Top of dam and saddle dikes	1106
Crest of spillway	1085

DIMENSIONS (feet)

Length along top of dam and intake structure	2,360
Total length of saddle dikes	6,600
Height of dam above river bed	192
Width of spillway chute	100

QUANTITY OF FILL (cubic yards, approximate)

Dam	3,751,000
Saddle dikes	771,000

POWER DEVELOPMENT

Power UNITS (kilowatts)	
Two main units, each	40,000
One service unit	8,000
